Professional Summary

Software engineer and competitive programmer with 6+ years of experience building full-stack applications and LLM-based systems (RAG pipelines, model fine-tuning), plus hands-on work in AI data annotation and evaluation. Codeforces Expert (max rating 1798) since 2017, BdOI national Silver and Bronze medalist, APIO national participant, and three-time ICPC Dhaka Regional contestant. Strong written and spoken communicator, comfortable with spreadsheets, technical writing, and narrating clear walkthroughs. Completing a BSc in Computer Science and Mathematics at BRAC University.

Education

BRAC University, Dhaka, Bangladesh *2022 – 2026 (Expected)*
BSc in Computer Science and Mathematics

Skills

Languages: C++, Python, Go, TypeScript, JavaScript, Java

Algorithms & Core CS: Data Structures & Algorithms, Competitive Programming, Graph Theory, Dynamic Programming, Combinatorics, LaTeX

AI/ML & Annotation: RAG Pipelines, Vector Embeddings, LLM Fine-Tuning, Prompt Engineering, LLM Evaluation, Reference Solutions & Reasoning Traces, Edge-Case and Test Design

Backend: NestJS, Express, Flask, SpringBoot, Echo, Go Fiber, PostgreSQL, Redis, SQLC

Frontend & DevOps: React, Next.js, Svelte, VueJS, HTMX, Docker, Kubernetes, Prometheus, Grafana

General & Professional: Microsoft Excel / spreadsheets, technical and general writing, video and voice narration, GUI automation, data entry and quality checking, tutoring and mentoring, remote and self-directed work

Work Experience

Mercor *Oct 2026 – Present*
Odin – Writer (Independent Contractor) Remote, San Francisco, CA

- Author and evaluate technical, algorithmic, and code-generation tasks for AI research workflows, producing structured human-generated reference solutions and reasoning traces.
- Design complex edge cases and verification criteria in C++, Python, and Go to benchmark and improve large language model performance on programming problems.
- Perform GUI manipulation and workflow automation tasks, carrying out multi-step actions across applications and interfaces to produce reliable demonstrations for AI training.
- Prepare video recordings with spoken narration of on-screen tasks, serving as training and evaluation material for AI systems.

Toptutors *Dec 2024 – May 2025*
Backend Software Engineer (Contractual) toptutors.com

- Built RAG pipelines integrating vector stores and embedding models, replacing standard keyword search for multi-context queries.
- Developed 2 Go and Flask microservices to process concurrent data payloads, handling 5,000+ daily queries.

Rantir *Nov 2023 – June 2024*
Software Engineer (Contractual) rantir.com

- Deployed GPT-4 models to production to parse and format content, replacing manual data entry workflows.
- Built 4 Next.js web applications using OpenAPI/Orval spec generation, eliminating manual API typing across 20+ routes.

Fiverr *Sep 2023 – Oct 2024*
Freelance Software Engineer & Technical Mentor

- Taught Data Structures, Algorithms, and C++ to 10+ clients, focusing on coding interview preparation and algorithmic problem solving.
- Delivered 2 full-stack applications (React, Express, Flask) with automated CI/CD pipelines for staging and production.

Sysonex Inc. *Feb 2023 – Sep 2023*
Full-Stack Software Engineer (Part-time)

- Shipped 2 full-stack MVPs from scratch within a 12-week window using Agile sprints.
- Implemented WebSocket connections for real-time features and added composite indexes to PostgreSQL tables to resolve N+1 query delays.

Sazim *June 2022 – Feb 2023*
Full-Stack Software Engineer sazim.io

- Built frontend interfaces with React and Next.js, implementing SSR to achieve 95+ Lighthouse scores.
- Wrote backend REST APIs with NestJS and Ruby on Rails, configuring database schemas for 15+ core tables.

Titans Education *Feb 2021 – Dec 2021*
Software Developer (Contractual)

- Migrated legacy web infrastructure and implemented caching layers; configured automated database backups and maintained uptime for enterprise WordPress instances.

Salesenzine *June 2019 – Nov 2020*
Software Developer (Part-time)

- Wrote automation scripts for marketing workflows, replacing 10+ hours of manual data entry per week; implemented technical SEO updates on high-traffic WordPress sites.

Competitive Programming Achievements

Codeforces: Expert, max rating 1798 (ahnaf.shahriar.asif)

Olympiads in Informatics: BdOI Silver Medal, 5th place nationally (Mar 2019); BdOI Bronze Medal (2020); APIO National Participant (2020)

ICPC Dhaka Regional: Regional contestant three times (2022, 2024, 2025)

Inter-University Contests: 2nd at UIU (2025); 6th at BUET (2023); 9th at NDUB (2026); 10th at SUST (2026)

Personal Projects

Course Platform: Scalable Learning Management System *2026*

- Monorepo LMS with a Go (Echo, SQLC, PostgreSQL, Redis) backend and Next.js 16 frontend connected through an OpenAPI-generated client (Orval).
- Dedicated media server for FFmpeg HLS video transcoding with Minio storage and Asynq workers; observability with Prometheus, Jaeger, and Grafana; deployed on Docker Compose and Kubernetes. Source

Nokol Ar Hobe Na: 3D Scene Simulation *2026*

- Interactive 3D scene in Python and OpenGL (PyOpenGL/GLUT) using a strict Entity-Component-System architecture, with animation state management and object inspection. Source

MarauderBoard: Project Management App *2025*

- Minimalist project management app with real-time chat and AI integration, built with HTMX and Go. Source

BRAC University ST Allocation App *2023*

- Officially used by the BRAC University MNS department. React, NestJS, and PostgreSQL. Frontend Backend

Algorithm Visualizers: Tower of Hanoi (2022) and 2D Graph BFS/DFS (2021)

- Interactive visualizations of recursive Tower of Hanoi and BFS/DFS on a 2D grid (VueJS). Hanoi demo Graph demo
